PROFILE

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, DBMS, and Web Development. Proficient in Java, Python, C, JavaScript, PHP, and MySQL with hands-on experience developing responsive web applications and database-driven solutions.

PROJECTS

RetailFlow — Full-Stack E-Commerce Platform — Team Project [| Live |](#) [GitHub](#)

Tech Stack : React 19, React Router 7, Vite, JavaScript (ES6+), HTML5, CSS3

- Developed a responsive React.js frontend for a microservices-based e-commerce platform, implementing role-based authentication, product catalog, shopping cart, and checkout workflows by integrating REST APIs and ensuring a seamless user experience.
- Built reusable React components, configured React Router for client-side navigation, and optimized the UI for responsiveness, seamless user experience, and cross-device compatibility.

DentaCare Management System [GitHub](#)

Tech Stack : HTML, CSS, PHP, MySQL

- Built a full-stack dental clinic management system using HTML, CSS, PHP, and MySQL to manage patient records, appointments, billing, treatment details, and dentist information.
- Designed a responsive frontend and integrated secure backend functionalities for appointment scheduling, patient data management, and billing operations with reliable database interaction.
